

Customer Case Study – Energy Audits

Market Sector

Healthcare & Care Homes.

Scope & Scale

17,000 staff. 200 Care Homes.

Background

Barchester Healthcare specialise in delivering top quality care in their care homes. They offer a wide variety of care options from short and long-term residential care to nursing services, assisted living and registered hospitals along with services for adults with severe disabilities and/or mental health needs.

Solution & Outcome

Envantage saved Barchester xx% on energy costs by improving their everyday practices and recommending investment in efficient technologies. Envantage's solutions included shut-down procedures, building services such as lighting and heating, transport fleet management, and process energy such as motors, drives, cooling or heat recovery. Envantage carried out audits to ISO 50002 standard, using our extensive experience to clearly outline most efficient use of energy and the key opportunities for cost-effective savings.

“A very professional and thoughtful approach that met all our requirements. A strong range of expertise and capability with a client-focussed approach, putting our needs and the needs of our residents and staff before all else. A very valuable collaboration that will underpin our Energy Strategy for the coming years.” Joel Turner, Energy & Environment Manager, Barchester Healthcare.
