

Envantage

Energy & Low Carbon Specialists

ENERGY POLICY

Envantage Ltd recognise the importance of efficient use of energy across our operational activities; with the purpose of preserving natural resources, reducing atmospheric emissions and helping to mitigate the effects of climate change. We are committed to maintain an effective energy management system that complies with ISO 50001:2011.

It is the policy of Envantage Ltd to ensure that:

- We use energy as efficiently as is practicable across our operational activities and establish objectives and targets to continually improve energy performance and reduce our carbon footprint.
- We comply with all relevant legal and other requirements relating to the company's energy use, consumption and efficiency.
- We ensure the availability of the necessary information and resources to meet our energy objectives and targets.
- All employees are made aware of both Envantage's energy related impacts and their role in improving the company's energy performance.
- We continually improve our energy management systems, procedures, and energy performance.

The company's Energy Management System manual includes our energy objectives and key energy procedures.
